

FOR ARTHROSCOPIC AND OPEN SHOULDER SURGERY

THE SCHLEIN ULTRA™ SHOULDER POSITIONER

SCHLEIN ULTRA™ SHOULDER POSITIONER

The Schlein Ultra Shoulder Positioner provides a safe, convenient and stable method of maintaining patients in the beach chair position for arthroscopic and open shoulder surgery.

- Minimizes setup tasks
- Eliminates lateral decubitus positioning concerns
- Fits all surgical table models
- Offers effective solution for precise shoulder positioning

Headrest wings retract posteriorly creating a totally obstruction-free space around the patient's head for the anesthetist.

With the wings in place and head strap positioned, the headrest becomes a secure head support.

The cervical flexion angle for a kyphotic patient is accommodated with the adjustable headrest.

ENHANCED EASE OF USE

The Schlein Ultra is designed to suit the high demands of the OR Suite.

- The center mounted support rod assures unobstructed radiolucency at the surgical site.
- The phenolic backrest has a low contour for optimal shoulder access both anteriorly and posteriorly.
- All release levers and adjustment knobs are readily located for convenient access and easier positioning of the patient.
- The headrest adjusts superiorly and inferiorly to accommodate the patient's height.

PATIENT CARE KITS

Single use Patient Care Kits may be customized to accommodate each patient. On the operative side, tear along the perforations to increase shoulder access. Leave pad in place to support the non-operative shoulder.

The headrest tilts laterally up to 30° in either direction.

5358, 5345, 5394

SUSP

5338-100

5338-70, 5393

SPECIFICATIONS

Headrest Translation

Anterior Range	5 in.
Longitudinal Range	8.5 in.
Lateral Tilt	30°
Patient Weight Capacity	400 lbs.
Schlein Ultra Weight	29 lbs.

ORDERING INFORMATION

- 5358 — Schlein Ultra™ Shoulder Positioner
Comes with three Patient Care Kits
(OSI Model No. 5348).
- 5345 — Patient Care Kit
Three per case. (Others available.)
- 5394 — Aluminum Side Rail Socket
(Two required.)
- SUSP — Schlein Ultra Complete
- 5338-24 — Schlein Shoulder Positioner Cart
This specially designed cart transports the
positioner, accessories and reserve Patient
Care Kits. (The Schlein Ultra fits in the same
storage cart for the SSPH.)
- 5338-100 — Lateral Support Pad Assembly
This specialty pad assembly provides
additional support and prevents the patient
from shifting laterally during the rigors of
surgery. (Clark Socket included.)
- 5338-70 — Translating Arm Board for Schlein
Arm board may be positioned to provide
a platform for either arm.
- 5393 — Clark Socket

Attaches to any OR table.

The manufacturer thanks Allan P. Schlein, M.D., for his assistance in the development of the OSI Schlein Shoulder Positioner. U.S. Patent No. 5,515,867. Other patents pending.
