QA3
Patient Trolley System

Designed following comprehensive research into patient trolley function and ergonomics
The QA3 version 3.0 Variable Height Patient Trolley: ideal for patient transport, examination and intubation in theatre and clinical areas. Designed for maximum patient comfort, the trolley is supremely manoeuvrable, compact, light weight and robust.
A specially designed version of the QA3 for Accident & Emergency departments is available. This will include an X-ray translucent platform, a medirail and the K8 pressure care mattress. Optional features include a monitor shelf and a Venturi suction system.
Innovative technology – practically applied

Anetic Aid Limited has been designing, manufacturing and supplying operating theatre equipment to hospitals in the UK and overseas for over 30 years. Renowned for innovation and high quality, the company believes in listening to customers and working closely with them to develop state-of-the-art products for a variety of clinical environments. It offers a broad range of equipment including surgical and patient transport trolley systems, tourniquets, theatre furniture, operation table accessories and surgical instruments.

With its commitment to using the latest technology and materials for maximum functionality, the company is proud to be launching the latest generation of its QA3 Patient Trolley System: ideal for patient transport, examination and intubation - and with a special model available for radiography in theatre and emergency areas - it is designed for maximum ease of use combined with superior patient comfort.

Its compact construction is lightweight yet robust, and its advanced steering system and ergonomically positioned pushing handles make it supremely manoeuvrable and easily guided by one person. Wider than the previous version by 100mm (although the overall trolley width has only increased by 30mm), it descends to an exceptionally low height, while unique foldaway cotsides store away under the mattress footprint to give a virtually zero transfer gap. The back rest is gas assisted for easy lifting and Trendelenburg (and reverse Trendelenburg) tilt can be operated instantly at any height from the head end.

**Patient comfort** – exceptional low height capability and stow away cot sides allow easy mount/dismount particularly for elderly patients. Wider patient platform and pressure care mattress ensure maximum patient comfort. Improved ground clearance allows better access for patient hoists.

**Pushing handles** – four ergonomically positioned pushing handles give supreme manoeuvrability either with the patient lying flat or sitting up.

**Infection control** – smooth moulded surfaces and acrylic capped vac formings; enclose the trolley mechanics to minimise dirt traps. Anti-bacterial properties and innovative design ensure the product is easy to clean.

**2 fixed transfusion poles** – fitted as standard to emergency trolley.

**X Ray translucent platform** – full length radio translucent platform suitable for digital or traditional plates.

**K8 pressure care mattress** – manufactured from temperature-sensitive gel foam that moulds to the patient’s body shape, relieving pressure by distributing the load as evenly as possible. Developed with the flexible properties of lycra, this outer material is anti-microbial, water resistant, vapour permeable and latex free.

**Advanced braking** – exceptionally stable platform, advanced single bar braking system that allows all four castors to be braked simultaneously from either side of the trolley.

**200mm castor option**
Ref no.: 21132
Increased ground clearance assists departments with difficult terrain; improved hoist access.

**Emergency Venturi suction system**
Ref no.: 21145
Compact system offering oxygen and suction suitable for emergency situations.

**Foot end stop/monitor shelf**
Ref no.: 21150
Removable device which locates to the trolley’s foot end.

See back cover for additional extras.

A specially designed version of the QA3 for Accident & Emergency departments is available. This will include an X-ray translucent platform, a medirail and the K8 pressure care mattress.
Lifetime service and maintenance offer on all new QA3 Trolley Systems

A comprehensive product servicing and maintenance programme is available for all QA3 Patient Trolleys, delivered by Anetic Aid’s network of field engineers across the UK. Recognising the need for rapid response, the company keeps a stock of every component required for this product.

Standard features
- Hydraulic lift mechanism – exceptional low height capability
- Vertically operated cotsides – giving a virtually zero transfer gap
- Trendelenburg tilt – extremely smooth and controlled mechanism
- Latest castor technology – low rolling resistance for high manoeuvrability
- 5th wheel steering – easily guided by one person
- Pushing handles – ergonomically positioned
- Gas assisted backlift – horizontal to near vertical
- Advanced braking system – exceptionally stable platform
- Fixed transfusion pole – innovative quick release
- Cylinder trough – side loading
- K8 pressure care mattress
- Patient utility trays
- Rotating buffers – at head and foot ends
- Infection control – anti-bacterial properties and smooth moulded surfaces

Dimensions
- Overall length: 2130mm
- Overall width: 735mm
- Height range (Non X-ray) – 475mm to 775mm (excluding mattress)
- Height range (X-ray) – 520mm to 820mm (excluding mattress)
- Weight: 118kg
- Maximum patient weight – 250Kg (Please refer to user manual)

Optional extras
- 200mm castor option 21132*
- Reverse Trendelenburg 21135*
- Complete emergency Venturi suction system 21145
- Foot end stop/monitor shelf 21150
- Fixed pushing handles foot end 21155*
- Spare transfusion pole removable 21160
- Spare transfusion pole fixed 21161*
- Grey cotside covers 21172
- Child print cotside covers 21173
- Department identification 21175*
- K8 pressure care mattress 21185
- X-ray tray 21195
- X-ray tray guides 21196*

*Denotes factory fitted option – please specify at the time of ordering
